

FREEDOM 32 "ANIMAL RESISTANT INCLUDING BEARS"

Model Number : HFB-32 All Metal Design

HFB-32A All Metal With Ad Panel Insert Option

HFB-32S All Metal With Recycled Plastic Siding (as shown)

DESIGNER NOTES

The Freedom 32 Animal Resistant (Including Bears) Waste Receptacle improves on several traditional designs in the market by focusing more attention on ease of use, aesthetics, and maintenance. It has gone through extensive testing and has received official bear proof accreditation, certified by "Living With Wildlife Foundation".

Some of the key design improvements that make this unit unique include.

- A redesign of the traditional loading door from the standard "pocket" hand-operated latch system found on many animal resistant receptacles to an innovative foot pedal. Easy to use, the pedal provides a very convenient way to dispose of waste with-out having to worry about touching anything with your hands.
- Many communities have issues with residential garbage ending up in the public waste receptacles The design is intentionally restricted to a smaller opening dimension on the loading door to make it more difficult to put large objects in.
- A hidden door latch system for accessing the waste makes it easier for the maintenance folks to maintain. Don't have to worry about locks or keys anymore.
- Front opening door design allows more flexibility for positioning on a street scape.
- The curved back ensures water runoff and does not become a resting spot for objects.
- A summer/winter conversion kit is also available that disables the foot pedal (which can be under a foot of snow in some areas in the winter) and allows for the installation of a handle on the loading door during this time.

AVAILABLE RECYCLED PLASTIC LUMBER COLOURS
