

URBAN SPACE WALL MOUNT BIKE RACK

Model Number : USWM-77

Wishbone
site furnishings

DESIGNER NOTES

This bike rack was designed as a result of a request from one of our customers looking for a creative way to maximize space in an underground parking lot application. While trying to encourage the use of bikes while at the same time maximizing the space for vehicles and storage lockers this idea was created. Our thinking was why not mount the bikes upright and take up 1/3 the space. Most bikes are made from such light weight materials these days that lifting them up is not as much a concern as in the past. In situations where the site may not be secure we have also created a mounting bar that allows all the major components to be locked to it giving a piece of mind to the owner.

PRODUCT SPECIFICATIONS
