100% RECYCLABLE

DESIGNER NOTES

The Annison Modular Curved Bench is a new concept in seating that is innovative and multifunctional. The design primarily focuses on allowing our customers the opportunity to create a variety of seating arrangements by simply connecting benches together. Fun and colourful, the features of this bench make it perfect for spray parks, playgrounds, and daycare centres. The seat height is comfortable for both adults and younger children, while the roto-moulded plastic construction is extremely durable, and UV stabilized to be colourfast.

The Annison Modular Curved Bench does not have to be bolted down and can be secured in a location simply by filling it with water. This is ideal for applications where the bench needs to be fixed to one location but cannot be fastened down to a pad such as spray parks. The weight of the water (692 lbs) keeps the bench in place making it virtually impossible to move. To ensure the water does not go rancid add 1 tablespoon of bleach when filling it up. When the time comes for it to be removed or repositioned, remove the hidden drain plug behind the end cap allowing the water to drain out.

Each bench comes with two end caps and two bolt down plates. In the case of connecting multiple benches together, the end caps will be substituted with joiner plates for a seamless transition between the benches.

Wondering where the name of the bench came from? It's a combination the first names of the designer's two granddaughters: Anna and Addison. They can be spotted in some of the gallery photos.
