

CITY SCAPE WASTE RECEPTACLE

Model Number : CSTR-35

DESIGNER NOTES

The horizontal lumber orientation and minimalist look of the City Scape Waste Receptacle matches well with modern architectural elements. The rectangular footprint minimizes the width of the unit while maximizing capacity for those areas where space is limited. Openings on both sides allow easy access while the funnel design ensures all waste is directed towards the liner. Its solid top and rectangular opening are designed to deter locals from emptying their household waste.
